SECURITY SAFETY MEETINGS

City Center Security will host the Safety Meetings for tower tenants in April.

Topics covered during the training include emergency preparedness for weather-related or fire events within the buildings, who to call in case of a medical emergency, what to do if you see a suspicious person on-site, and so much more!

It is recommended that all Tenant Safety Representatives from your office attend one of the trainings listed below.

Contact Melissa Saenz if there has been a change in the Safety Representative from your office.

April 25, 26, 27 or 28
2:30 - 4:30 pm
City Club

Maintenance in the Garages

Because the garages are subjected to the varying weather elements experienced in North Texas, City Center teams regularly conduct visual assessments of the buildings and garages. This routine process is part of the greater strategy to plan and schedule maintenance prior to a bigger problem occurring. In a recent assessment, it was noted that the wear and tear of water through the years has caused some damage in the garages that now needs repair. We've called in the pros - a structural engineering firm - and now the repairs have begun.

Garage 1 parkers may have already seen some of the preventative maintenance work in progress. The good news is, the beams are in place temporarily for safety and weight distribution needed during the repair, and once the work is complete, they will be removed. The Garage 1 repair is the first of many you'll see in the coming months between both garages. Future repairs may not be as large or noticeable as the current Garage 1 remedy, but you may see a few parking spaces blocked off here and there as the work is being done. Again, once the work is complete, the area will be open and back to normal as quickly as the work allows. We thank you for your patience!

Many thanks to those that donated blood earlier this month! We had a tremendous turnout and many pints of life-saving blood were collected.

Have you ever wondered "Where does the blood go after I donate?" or "Who does my blood help?"

Watch this short video from Carter BloodCare that illustrates the donor-to-recipient journey.
